

TRADITIONAL: COASTAL LANDSCAPE DESIGN

Painted Sands

At Sea

Steel Wool

Light Blue

If you live by the beach, you're one of the few and the proud to display teak and rattan. If you like the look of sea shells and coral in your Nebraska home, then well, that's just awkward. Keep the marine artifacts and the hairdos that do well in the marine layer by the marina. For more garden design ideas, visit: www.landscapingnetwork.com/garden-styles
