

The Residential Landscaping Process

1. DEMOLITION, GRADING & SWIMMING POOL EXCAVATION

Removal of unwanted structures and surfaces. Grading to accommodate new elevated areas and to ensure proper drainage. Pool and water features excavated and constructed.

2. UTILITY LINES & IRRIGATION SYSTEMS

Trenching for water, gas, and electric lines according to the site plan. Irrigation and sprinkler locations plotted and placed. Leave soffits for future expansion or replacing lines beneath hardscaped areas.

3. BUILDING WALLS & CONSTRUCTING HARDSCAPES

Placing of hardscape materials such as concrete, decomposed granite, gravel, etc. Construction of retaining walls, outdoor countertops, seating areas, patios, decks, and pathways.

4. INSTALL OUTDOOR ELEMENTS & PLANTING

Installation of fire pits, fireplaces, fountains, and other outdoor living elements. Placement of shrubs, vines, trees, and other plants.
